

ISSUE 8
JULY 29- AUG 2

WELCOME TO THE JUNGLE WEEK!

Last week at Discovery Camp, campers learned about the climate, environment, and locations of jungles. While at the Discovery Center, campers learned about organisms commonly found in jungles as well as which organisms were producers, consumers, and decomposers. Campers then got to test their knowledge of jungle animals with a game of "Jungle Relay" where they had to race as a given animal. Campers also took a trip to Urban Air where they were able to let their inner jungle-animal free.
